Project:- Historical Places of India - Minor Project

Step1- Created index.html file. Added basic tags in them. In title added a title and logo of Indian flag. Then I linked various css files and external css links. Then in body tag gave a header tag. In header added a header and two buttons, Home and Contact us.

```

<> index.html X # Minor.css
<> index.html > html > head > link
1  <!DOCTYPE html>
2  <html lang="en">
3    <head>
4      <meta charset="UTF-8" />
5      <meta http-equiv="X-UA-Compatible" content="IE=edge" />
6      <meta name="viewport" content="width=device-width, initial-scale=1.0" />
7      <title>Historical Monuments of India</title>
8      <link rel="icon" type="image/x-icon" href="India.png">

12   />
13   <link rel="stylesheet" href="Minor.css">

25         <ul class="nav navbar-nav" style="float: right;">

Step2- Gave a main tag and added different images of monuments and links to them. Also added a audio of National Anthem at the end.

```

Minor Project

Step4- At last I created individual webpages of each monument, gave some information about that monument and added some styles to them.
